

CT-PX2 / GAL

GALaxy LIFT CONTROLLER ENCODER CARD

PIXEL.

Specifications:

Operating Voltage: 12 - 33V DC
operating Current: 100mA
input protocol: GAL CAN
serial interface

COMPACT AND ROBUST

For easy installation

Direct connection to Pixel Displays

GAL CAN SERIAL INTERFACE

COMPACT INDUSTRIAL DESIGN

Introducing the CT-PX2 Interface Module: Your answer to effortless landing display installations.

The CT-PX2 interface module is a multi-protocol lift encoder providing a serial link interface for both the Galaxy CAN and Otis RSL and converting these into Pixel Technologies Mode 3 DataBus protocol, providing seamless integration from lift controller to Pixels audio & visual devices.

Its industrial-designed small form factor package makes for the perfect cost effective landing encoder interface solution for your installation.

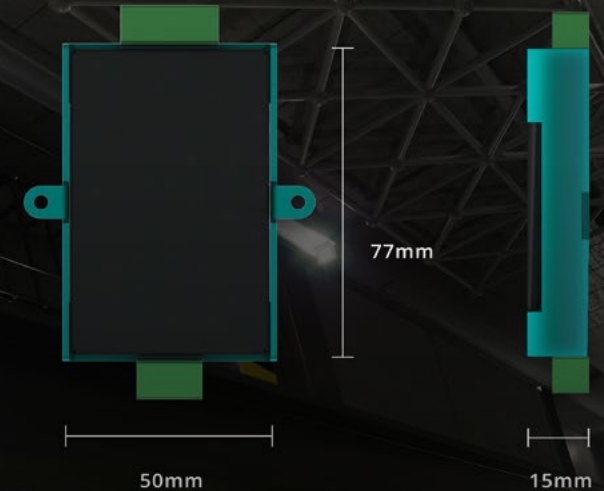

Setup: You can connect to the CT-PX2 via a wifi network using your PC, laptop or mobile device to access the built-in web server. This allows for quick and easy RSL floor level and advanced parameter setup.

Specifications:

Output Protocols: Pixel Mode 3
Mounting: DIN Rail or Surface mounting
Dimensions: 68 (W) x 95.6 (H) x 15 (D) mm
