SOFTWARE AND CONNECTIVITY

The user friendly software allows for seamless design layout configuration and updates of the displays content via USB or LAN directly connected from a pixel network or by a remote wireless / internet connection from a connected wifi router.

Giving you complete control over the content on your display screens at any time - update tenant listings, building notices, advertising / media content and more, all with ease.

CLOUD MEDIA SYNC

The OPAL display range now offer an easy solution to manage and update your media directly from the cloud.

Using a cloud storage provider such as Google Drive, Microsoft One Drive or Dropbox, you can transfer media directly to the OPAL screen simply by adding or removing media from the hosted group folders, from anywhere in the world via the internet or even from your mobile phone.
