

### REPLACE CONVENTIONAL MECHANICAL BUTTONS

#### **Technical Specifications** Includes front lens with pin

3mm mount

# Do not use lifts if there is a fire

The Pixel 7-inch touch display - the perfect solution for modernizing your building's lift call buttons!

With our innovative technology, you can now replace those old-fashioned mechanical buttons and enjoy a sleek, touchless, and digital experience, with audible feedback and accessibility functionality. WATERPROOF & RESILIANT AGAINST HARSH CHEMICALS

Designed with easy maintenance in mind, our touch display features an industrial-grade polycarbonate lens that is resistant to harsh chemicals and cleaning agents. This makes it the ideal solution for public spaces, where hygiene is more important than ever before. Our touch screen can also be optioned for waterproof installations, built to withstand outdoor applications.

## TOUCHLESS TECHNOLOGY

#### Dimensions

Viewing area : 89.5 x 149.5 mm 214.6 x 109.5 x 37.5 mm

Our touchless technology is incredibly resilient and proven to activate buttons without physical contact. Users can simply hover their finger near the button to register a call to the lift, providing a clean and hygienic solution. And with the ability to respond even to gloved touches, our technology ensures continued use even during emergencies..

## CUSTOMISABLE DESIGN

With our fully customizable graphical layout, you can tailor the display to suit any landing space, from realistic conventional mechanical buttons to modern touch panels.
